

Instructions for Installing and Configuring the 8K VIP App

This guide contains 4 sections:

Section 1: Installing Downloader Section 2: Preparing Downloader to Install the 8K VIP app Section 3: How to Install 8K VIP Using Downloader Section 4: Configuring 8K VIP

Section 1: Installing Downloader

You will first need to install an app called Downloader in order to download 8K VIP onto your device. The Downloader app is officially available on the Amazon Store. You don't have to sideload it onto your device. Here is how you can install the app. If you already have Downloader installed, you can skip this section and move on to Section 2.

1. Go to the Fire TV / Stick home screen if you are not already there. Use your

remote to navigate to **Find > Search** on the menu bar in the middle of the

screen.

 Now, type in Downloader (without the quotes) using the onscreen keypad. As you begin typing, you should see the app suggestions on the list. When you see Downloader on the list, select and click it.

You should now see Downloader under the APPS & GAMES section.
Go ahead and click it.

4. Click the 'Get' or 'Download' button to download and install the app.You should have the app in no more than a couple of minutes.

Once the app is installed, you can access it from the Your Apps & Channels section.

Section 2: Preparing Downloader to Install the 8K VIP App

Before we install the app, we must first allow FireStick to install apps from unknown or third-party sources. Please follow these steps:

1. Launch your FireStick home screen and navigate to the Settings icon.

2. Scroll down to the My Fire TV tile and click on it.

3. Click on Developer Options.

Note: If you don't see Developer Options, then click on **About.** Then Click on the **Fire TV Stick** option quickly 7 times.

You will then see a notification at the bottom saying **No need, you are** *already a developer.*

After that, just press the back button and Developer Options should be seen as below.
